NDA_Robossis_Baitella_signed_20250605.pdf; 3.525-N-VE flex Index A.stp; 3.530-VE flex Index A.stp;

Dear Mohammad

1. Please find attached the countersigned NDA for your records.
2. Additionally, we have attached the 3D STEP files for the articulated arms 3.520-VE and 3.535-VE as requested.

Please note that while the attached STEP files are named slightly differently, they are 100% geometrically identical to the corresponding arms:

- For the dispatched arm 3.520-VE, please use the attached file 3.525-N-VE.
- For the dispatched arm 3.535-VE, please use the attached file 3.530-VE.

Due to the large file size of this email, we kindly ask you to confirm receipt.
Should you have any questions, feel free to reach out.

Best regards
Alain

Betreff: Re: [EXTERNAL] FISSO Holding Systems

Dear Alain,

Thanks for your kind response. As instructed, I completed and signed your NDA template. Please find it attached. Please let me know if you would like to see any changes or modifications to it.

Regards,
Mohammad

Subject: AW: [EXTERNAL] FISSO Holding Systems

Dear Mohammad,

Thank you for your message.

We will be happy to share the 3D models of our FISSO arms for your simulations.

However, in accordance with our internal policies, we require a signed non-disclosure agreement (NDA), which I have attached to this email.

This is a standard agreement that equally protects both parties.

Please complete the highlighted fields on the first page and sign the document at the end. Once we receive the signed version from you, we will countersign it and provide you with the CAD data.

If you have any questions, feel free to reach out at any time.

Best regards,
Alain

Betreff: Re: [EXTERNAL] FISSO Holding Systems

Dear Alain,

We are creating some renderings of the surgical workflow. I was wondering if you could share the CAD models of our two Fisso arms to include them in our simulations. That would be very helpful. I appreciate your kind attention.

Regards,
Mohammad

Dear Mohammad

Thank you very much for your update.

Sounds great!

Kind regards and best of luck with the project.

Alain

Betreff: Re: [EXTERNAL] FISSO Holding Systems

Dear Alain,

Thanks for your kind follow-up. In our cadaver and simulations studies, Fisso clamps seemed very promising to be used as part of our proximal bone attachment system to the table. We received supportive feedback from both our surgeons. This is something we are considering to continue to use in our future labs with our alpha prototype (our next-generation robotic system and robot cart). The alpha prototype is currently being developed, and we hope to test them by the end of the summer. I will keep you updated on the next steps and how we plan to use Fisso clamps, and if we need to purchase more items in the near future.

Regards,
Mohammad

Dear Mohammad,

I hope this message finds you and your team well.

I wanted to check in regarding the tests with our FISSO components.

Could you kindly share any feedback on their performance and potential use within your application? Additionally, it would be helpful to understand what the next steps in this project might look like.

Thank you very much and best regards,
Alain
